

Sodium Chloride Injection, USP 0.9%

DIN 02376342

This treatment applies to the following species:

- Beef Cattle
- Cats
- Dairy Cattle
- Dogs
- Horses
- Sheep
- Swine

Active ingredients:

Each L contains:
Sodium chloride 9 g

Inactive ingredients:

Water for Injection
q.s.

Milliequivalents:

Sodium, 154 mEq/L
Chloride, 154 mEq/L
Osmolarity, 308
mOsmol/L

pH, 4.5-7.0

STERILE

Sodium Chloride Injection, USP 0.9% Indications

An isotonic electrolyte solution as an aid in the treatment of dehydration and electrolyte disturbances associated with sodium and chloride in cattle, swine, horses, sheep, dogs and cats.

Dosage and Administration

Warm to body temperature prior to administration. For intravenous use only. Dose and rate of administration will depend on the clinical condition of the patient. Administer as determined by a veterinarian.

CAUTIONS: Do not use unless solution is clear. Additives may be incompatible. Discontinue infusion if adverse reactions occur. Contains no preservative. Discard any unused portion.

Storage

Store below 25°C. Keep from freezing.
