FOCUS ON VETS

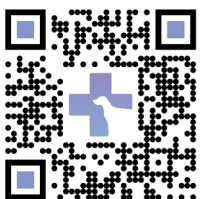

YOUR **PASSION** IS OUR FOCUS

For over 60 years, we've been a trusted source of information, innovation and expertise. We adhere to and uphold the principles of excellence in animal care. This is also reflected in our core values, the quality of service we offer and the people and companies we partner with.

As a full-service veterinary supply company, we exclusively serve veterinarians. This focus allows us to offer veterinarians the highest level of product solutions, services, and support, ensuring the best care for their patients, big or small.

Supporting veterinarians in their passion for ensuring that pets live their longest, healthiest, best lives possible is at the core of what we do. We are committed to offering veterinarians with the most innovative products for healthy, productive livestock. As a family-owned, family-operated business, we appreciate that by improving the health of animals, we can improve the lives of those who care for them.

McCarthy's deep roots in the Canadian Animal Health industry allow us to leverage strong partnerships with product manufacturers to provide veterinarians with the latest research, the newest products and the best value to support the success of their practice.

TONOVET Pro PREMIUM TONOMETER IOP MEASURING EXCELLENCE

Improved usability and versatility

- **200-degree position freedom**
- Quick Measure for easier and faster IOP measurements
- More responsive probe
- Advanced probe control for improved accuracy
- Display facing the user
- 3-year warranty
- Species- specific smart calibrations for cats, dogs, rabbits and horses

HIGH-DEFINITION WIRELESS ULTRASOUND FOR VETERINARIANS

Manage exams anywhere. Improve patient outcomes with clear, real-time imaging that is easy to use, affordable and ultra-portable.

- High definition imaging for a confident diagnosis
- Wireless scanner for easy handling and portability
- Intuitive and easy to use app for iOS and Android
- Dedicated presets for small, medium, large animals

Superior Image Quality	Reliable Portability	Easy to Use
High-quality images that are comparable to cart-based systems	Wireless freedom: no cables to trip over or break, and less risk of infections during procedures	Point-and-Shoot Ultrasound™ technology removes the need to adjust knobs and switches
Imaging settings are optimized based on scanning application	Stable connectivity from our proprietary multi-channel Wi-Fi architecture	Artificial intelligence adjusts parameters in real-time
Optimal results from specialized scanners		Compact and waterproof device that feels like standard scanners

 **Small Animals**
C7 HD3 Vet Microconvex Scanner

Frequency: **3–10 MHz**
Max Depth: **15 cm**

 **MSK Equine**
L7 HD3 Vet Linear Scanner

EARN CE AND LEARN HOW TO ULTRASOUND LIKE A PRO

Everything you need to get started

Ultrasound technology shouldn't be intimidating; it can be a vet's most valuable tool for discovery and diagnosis! With the endless number of how-to instructional videos made **specifically for veterinarians** most common cases, you can learn how to ultrasound like the pros, and **earn anytime CE** credits while you are at it! Not to mention, the **AI technology** of a Clarius helps you easily identify what you are looking for.

AI powered imaging
+ how-to guides
+ **CE trainings**

“Clarius ultrasound has changed the way we look at animals and enabled us to provide better care. Animals don't like being handled and having a lot of equipment around. So, having a small system with an iPad that they're already familiar with helps us to get an exam done quickly. Since it's so compact, we can carry it with us anywhere. It used to be difficult to carry our trolley system up and down the stairs.”

- Dr. Luke Ross, DVM - Veterinarian

PURCHASING GUARANTEE

*Purchasing **direct from McCarthy** ensures you will receive the **best price** for outright ownership of both the Scanner and Advanced Veterinary Software Package.

OWNERSHIP

Scanner **\$6,500**

Advanced Software **\$1,500**

Included in your purchase:

Advanced Software Package

The Advanced Veterinary Package offers more flexibility for users who need additional and advanced workflows for various animal examinations.

Specialized animal presets include:

- Abdomen
- Advanced Cardiac
- Bladder
- MSK
- Lung

Additional Advanced Features and Imaging Modes:

- Split Screen Mode
- Procedure Recording Mode
- OB Growth Table

MEMBERSHIP

Scanner **\$4,750**

1 Year Membership **\$785**

2 Year Membership **\$750 per/yr.**

3 Year Membership **\$725 per/yr.**

Included in your purchase:

Clarius Membership Subscription

Your new scanner includes a minimum one-year Clarius Membership so you can take advantage of all advanced innovation and services for the ultimate scanning experience and to fast track your mastery of ultrasound.

- Advanced Specialty Software
- In-app Clarius Classroom videos
- AI Powered Tools
- Monthly Online Training
- Clarius Storage (Cloud, DICOM, Local)
- 1-Hour Virtual In-Service
- Clarius Live Telemedicine
- Voice Controls

*Prices subject to change

VOLUMETRIC INFUSION PUMP WITH IV FLUID WARMER

With intuitive programmable infusion memory and simple warmer settings, it's the top choice for IV fluid warming.

- Use any standard IV set.
- Affordable-NEW, not refurbished
- Lightweight and portable, < 5 lbs
- Runs on standard 110V AC or battery.
- Simple to navigate menu screen lets you set infusion parameters, as well as change speaker volume, occlusion pressures, air sensitivity and calibrate IV sets.
- Select IV fluid warmer in settings and simply wrap the line around in the warming grooves. Can be used in ml/h or mcg/kg/min.

ELECTROSURGICAL UNIT

The most affordable unit available for today's veterinary surgeon. With more than enough power for any procedure.

Kit Contains:

- Main Unit
- AC Power Cord
- Foot Switch
- IND Plate
- Handpiece
- 7/pc Electrode set
- Instruction manual

EVERYTHING YOU NEED ALL IN ONE PLACE

WE'VE GOT YOU COVERED

Scan to see entire catalogue of products

With over 6,000 veterinary surgical instruments, laboratory equipment and animal health products for veterinary professionals from our partners at JorVet.

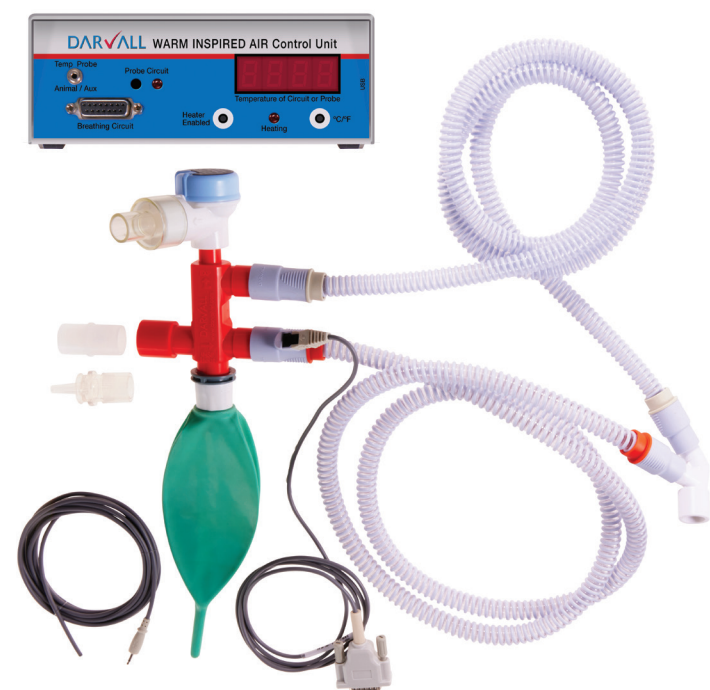

COZY HEATED BREATHING CIRCUITS

Safely warm patients with warm air inhalation with the first breath

Darvall's heated smooth wall breathing circuits are an innovative solution to critical heat loss by safely delivering warmed inspired gases to the patient immediately from the first breath after intubation.

Systems can be used in the three phases of anaesthesia:

1. Pre-warming after pre-medication has been administered, while the patient is in its cage
2. During induction, preparation and surgery itself
3. During anaesthetic recovery

BROUGHT TO YOU BY **Jorvet™**

IV SOLUTION BAGS FOR LARGE ANIMAL

Be prepared for new arrivals with these large volume IV solution bags.

New collapsible bag with large-size drip chamber for use with concentrates of lactated ringers. For rapid infusion of large volumes (3 L and 6 L volumes).

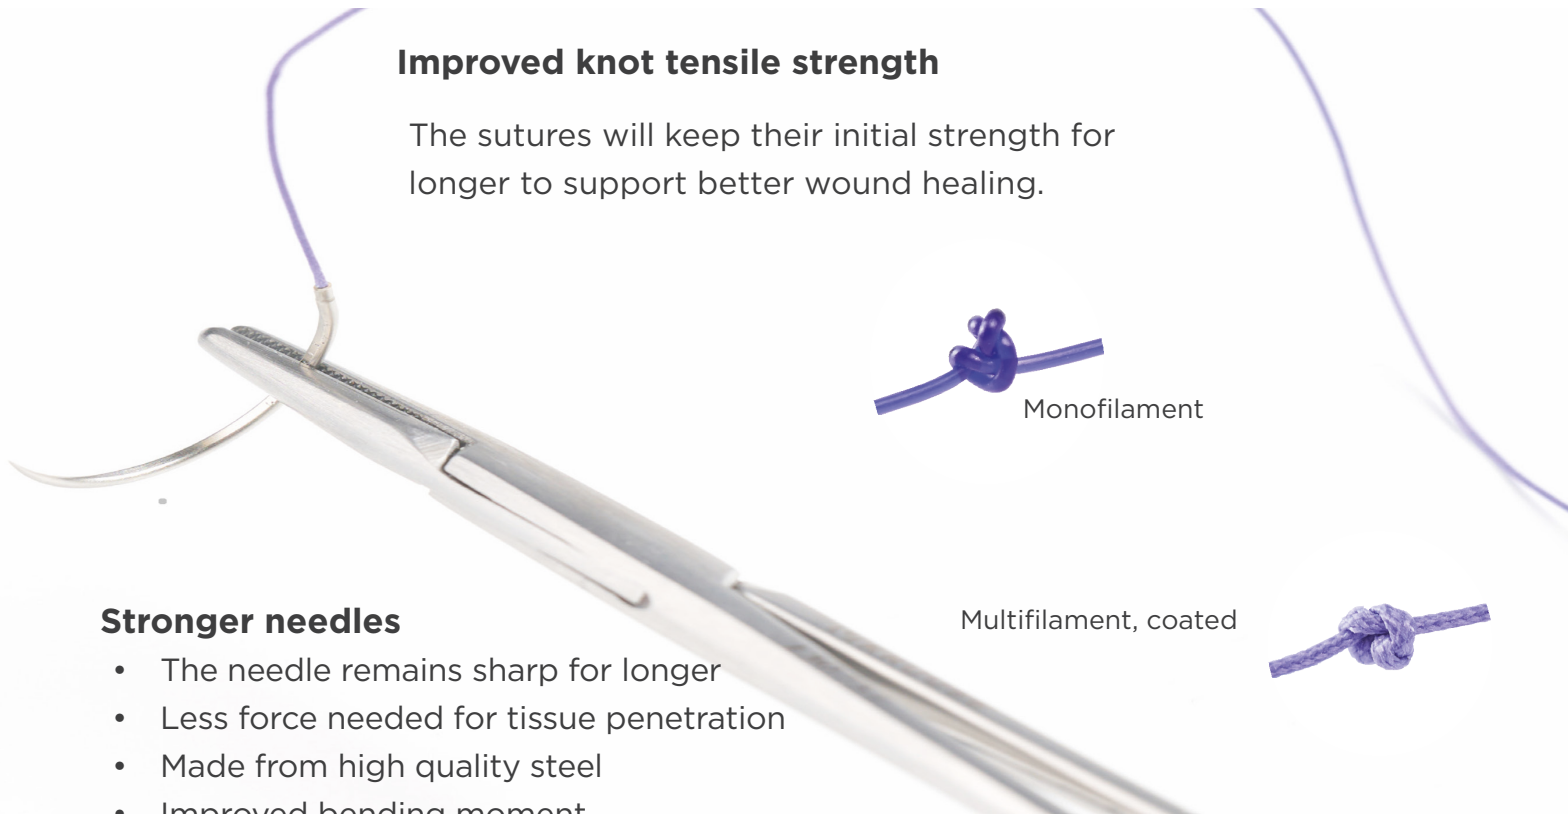

BROUGHT TO YOU BY **Jorvet™**

ABSORBABLE SUTURES

Making wound closure easy for faster patient recovery

Improved knot tensile strength

The sutures will keep their initial strength for longer to support better wound healing.

Stronger needles

- The needle remains sharp for longer
- Less force needed for tissue penetration
- Made from high quality steel
- Improved bending moment

Quickly find the proper suture and needle

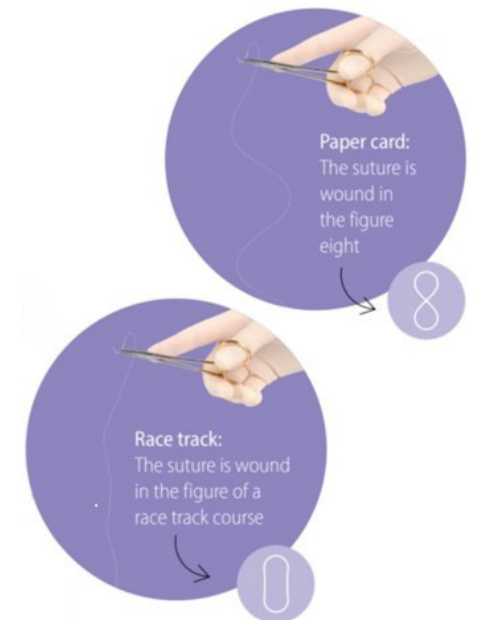

- 1:1 needle drawing
- International needle symbols
- Clear colour-coding
- Enlarged article number for easy reordering
- Easy instructions access via QR code

THE POPULAR RACETRACK

Surgeon's preferred choice

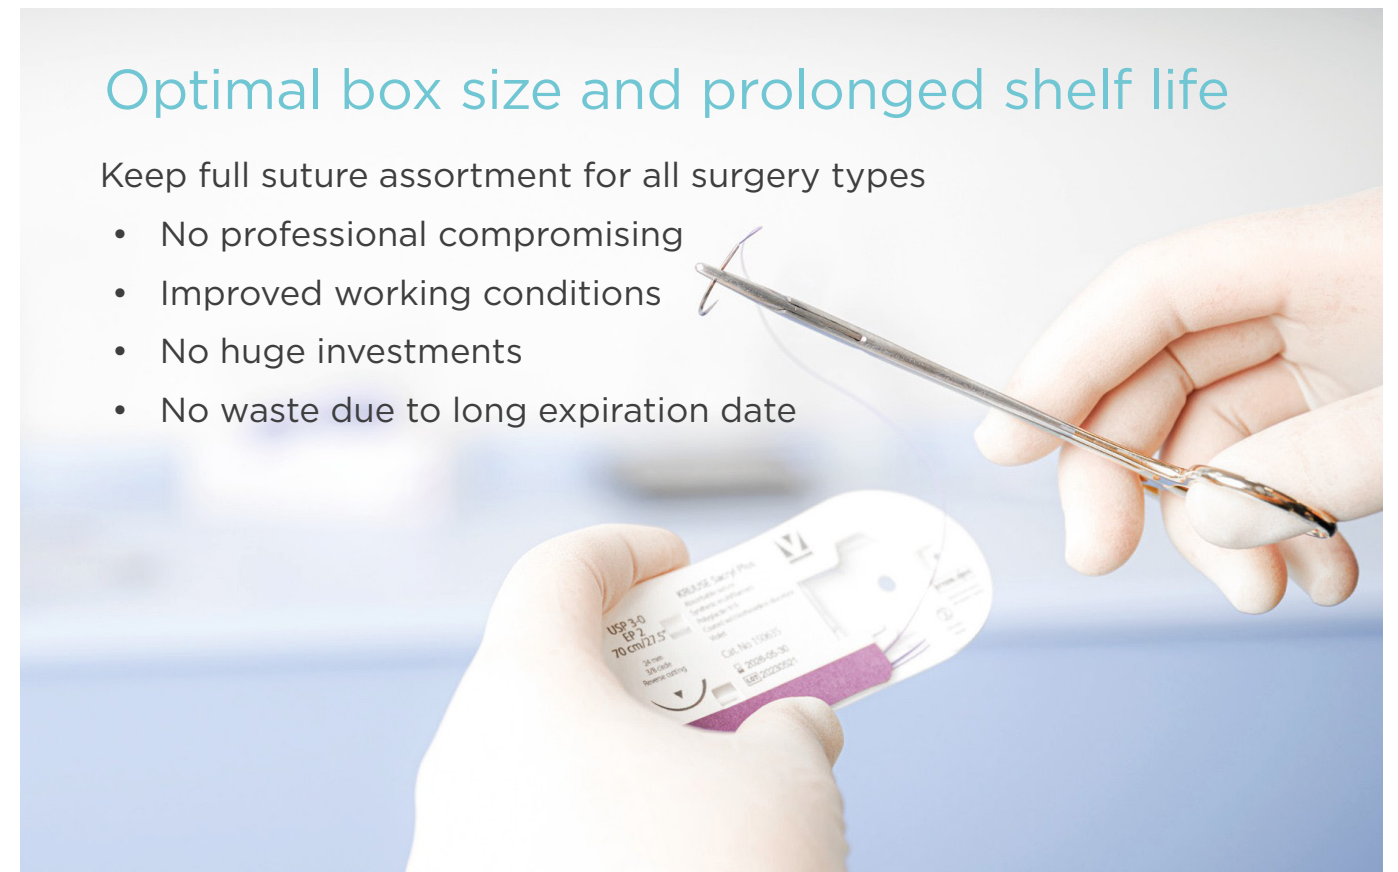

- The racetrack minimizes suture memory compared to paper card
- The needle is easy to withdraw from the retainer
- Reduced level of tangling

Optimal box size and prolonged shelf life

Keep full suture assortment for all surgery types

- No professional compromising
- Improved working conditions
- No huge investments
- No waste due to long expiration date

NEW!
INNOVATIVE
DESIGN

BEHOLD THE CONES OF FAME

Kruuse post operative collars are built for comfort and durability.

Every collar is flexible, transparent and easy to put on. They all come in a variety of sizes so you can find the perfect fit.

COMFORT Collar
With a soft rubber edge equipped with a new quick-fastening system.

CLIC Collar
Quick and simple CLIC closing system. Makes the application of the collar as easy as buttoning your shirt.

UNDER CONSTRUCTION & BONES Design Collars
Fun designer themes and colors!

ELIMINATE DOUBT ELIMINATE MISTAKES

Designed for enhanced safety and comfort

KRUUSE SafeVet® valve on
The balloon may be inflated. Do not remove the catheter.

KRUUSE SafeVet® valve off
The balloon immediately deflates. You can safely remove the catheter.

A choice for compassionate care

The KRUUSE SafeVet® valve serves as a safety mechanism for removal of the KRUUSE SafeVet® Foley Catheter. To initiate catheter removal, simply unscrew the KRUUSE SafeVet® valve. Wait until the catheter is fully emptied for safe removal.

Choosing Foley catheters for long-term catheterisation demonstrates a veterinary practice's commitment to providing compassionate, state-of-the-art care.

KRUUSE SafeVet® Foley Catheters are made from highly biocompatible silicone, ensuring maximum patient comfort.

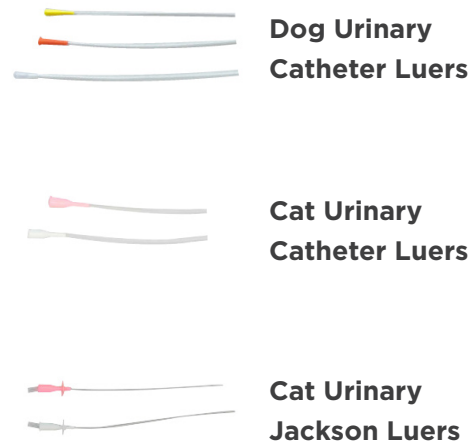

CATHETERS FOR EVERY NEED

ClearView Foley Catheter allows continuous drainage from the urinary bladder and is also used for contrast studies of the urogenital tract. A sterile, radiopaque, closed-end silicone catheter with a distal balloon cuff. Sterile. Radiopaque, atraumatic, autoclavable. Color coded.

Tomcat Urinary Catheter is made of silicone for optimal patient comfort and ability to be left in long term (up to 3 days) if necessary. The Tomcat allows drainage and administration of fluids. Open or closed tip. Sterile. Single use.

Slippery Sam Tomcat Urethral Catheter a rigid PTFE (teflon material) coated catheter designed to provide easy and atraumatic placement without the use of a stylet. Used to unblock the urethra, to alleviate urethral obstruction and allow drainage and administration of fluids. Single Use.

SWEET DREAMS ARE MADE OF THESE

Our commitment to you

By leveraging the Fresenius Kabi worldwide manufacturing and supply chain network and McCarthy Veterinary Supplies distribution expertise, we are committed to providing the highest quality products and service to our veterinarian customers.

ELEVATE YOUR STERILIZATION

NEW state of the art ozone-based sterilization systems

Experience the advantages of ozone-based sterilization to eliminate 100% of toxic chemicals, prolong the lifespan of your surgical instruments, and stay ahead of the regulatory curve.

- Lower cost and shorter time than ethylene oxide and plasma sterilizers
- Large instrument capacity for veterinary hospital efficiency
- Smart screen for intuitive management of sterilization cycles & seamless remote updates via Wi-Fi
- **Low cost per sterilization @ \$9-16/cycle***
*cost may vary

SteriBase

Plug & Play station to closely monitor and safely validate each cycle.

- Compact
- User-friendly interface
- Low-maintenance

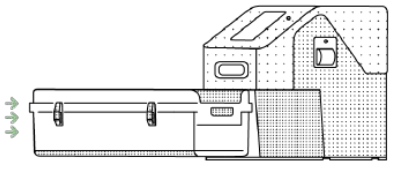

SteriBox

Robust and durable container for optimal conditioning and long-lasting sterility.

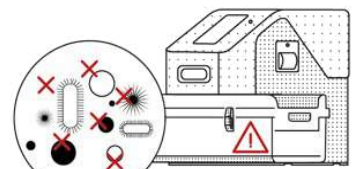

- Mixed loads
- One-size-fits-all
- RFID technology

How does it work?

Ozone is a potent biocide gas, conveniently generated from air on site and effectively diffused within the SterOx container.

Our system closely monitors high gas concentration and humidity levels, ensuring optimal process efficiency and the effective destruction of various microorganisms, including bacteria, yeast, fungi, viruses, and spores.

At the end of the sterilization cycle, rest assured that all residual biocide gas is actively removed, leaving only pure oxygen behind. Sterilization report emailed automatically.

Wide compatibility with veterinary instruments

Minimally invasive laparoscopy and endoscopy systems are a significant investment, **improving the quality of care you provide and increasing the revenue for your practice.** SterOx helps you **protect your investment** by letting you safely sterilize a wide array of veterinary electro-surgical instruments, surgical and practice tools, **including those that do not withstand heat or moisture.**

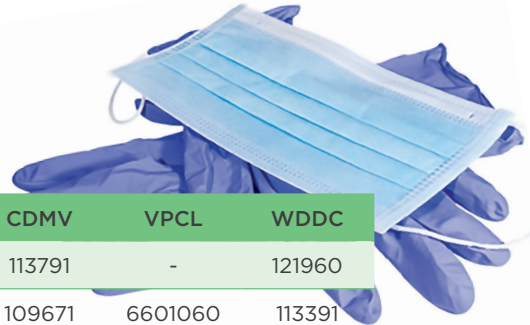

Critical Equipment	Semi- and Non-Critical Devices
<ul style="list-style-type: none"> • Laparoscopic sealers • Ureteroscope • Endoscopic accessories • Rigid endoscopes • Electrosurgical knives 	<ul style="list-style-type: none"> • Surgical power tools • Surgical tools • Skin staplers • Trocars • Disposable grasper
	<ul style="list-style-type: none"> • Syringes • Oscopes • Liga Fiber • Fur clippers • Rigid Endoscopes • Thermometers • Ultrasound probes • Stethoscopes and Dermatoscopes

“ We use the SterOx System to sterilize all our instruments, including but not limited to our respiratory endoscopy equipment and our electric scalpel parts. The handling of the device is quite simple and very standardized.”

- Dr. Moulin, Belgium

RAFTER PRODUCTS

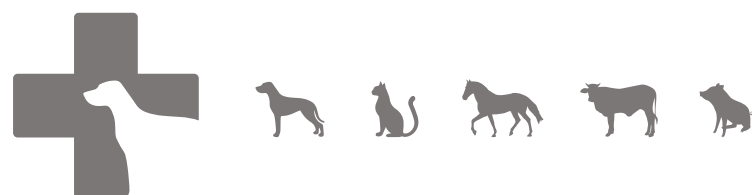

Quality pharmaceuticals and nutraceuticals from Rafter 8. Providing the best care and the best value for veterinarians and their patients across Canada for over 30 years.

- Cost-efficient
- Proven safe and effective
- Unique presentations only found in the Rafter 8 line of products

TRUSTED LINE OF PRODUCTS PREFERRED BY VETERINARIANS AND RECOMMENDED WITH CONFIDENCE

WHAT IS A GENERIC DRUG?

A generic drug is an alternative drug to the brand name or reference drug that is the pharmaceutical equivalent.

Generic drugs are stringently tested through Health Canada's approval process to be the bioequivalent (containing the same active medical ingredients, in the same amounts and

in a similar dosage form). While generic drugs may have different non-medicinal ingredients (excipients) than the brand name drug, the makers of generic drugs must show that these do not affect the safety, efficacy or quality of the drug compared to the brand name drug.

HOW ARE RAFTER 8 GENERIC DRUGS APPROVED IN CANADA?

When Rafter 8 wants to bring a generic drug to Canadian market, it files a generic drug submission to Health Canada. This submission is called an Abbreviated New Drug Submission (ANDS). It contains information on:

- The ingredients with amounts and specifications;
- How the drug will be made;
- How the drug will be tested during manufacture;
- How each lot of the drug will be tested before being distributed or sold.

A generic drug submission also requires tests to show that the drug is bioequivalent to the brand name drug. The testing that is required depends on the details of the generic drug and also the current laws, regulations and guidance documents.

HOW DOES HEALTH CANADA MONITOR THE SAFETY AND EFFECTIVENESS OF GENERIC DRUGS?

Generic drugs are monitored in the same way as other drugs.

Scientists and clinicians in the Health Products and Food Branch of Health Canada evaluate reports from consumers, manufacturers, health professionals and other regulators. If issues are identified, actions can be taken, including:

- Publishing and distributing new safety information for healthcare professionals and patients;
- Changing the product's labelling;
- Removing the product from the market.

Active and inactive ingredients, manufacturing processes and facilities must meet the VDD's strict requirements for Good Manufacturing Practices (GMP) and manufacturers must conduct a series of tests, both during and after production, to show that every generic drug batch meets the same requirements as requested for pioneer drugs

WHY DO SOME RAFTER 8 GENERIC DRUGS LOOK DIFFERENT FROM THE BRAND NAMES?

A generic drug may look a slightly different than the brand name of the same medication because they have different nonmedicinal ingredients (excipients) which can affect colour, size or shape. It's important to remember that even though a generic drug may look different than the brand name drug, it is still bioequivalent and it will still act the same way in the body as the brand name drug.
